

EMATIK RUN

Semi-Manual Kit for injectable PRP

THE SOLUTION FOR SMALL AND BIG ANIMALS

EMATIK RUN is a Prometheus product

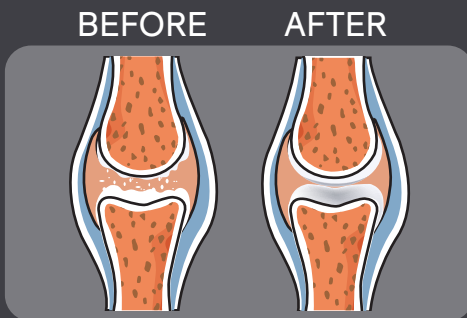

Ematik Run kit

Ematik Run is a disposable kit for regenerative medicine. Liquid Platelet Rich Plasma (PRP) is obtained from a simple blood collection, through an easy extraction process.

The kit allows to obtain up to 3 applications, preservable in the freezer for 3 months from the blood collection for following treatments.

How Does it work?

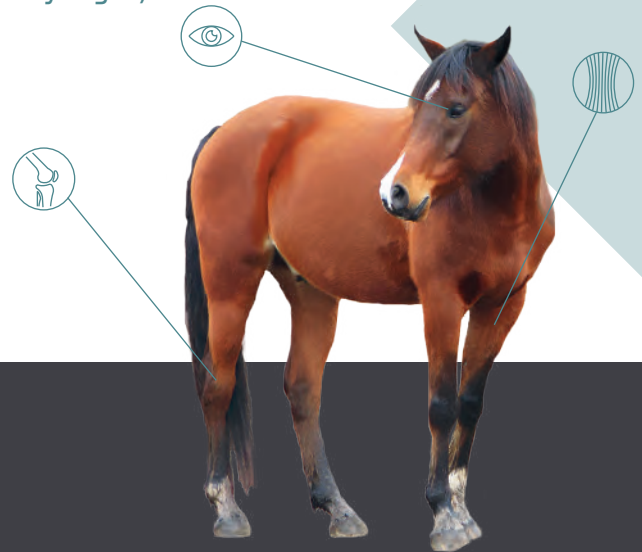

The unique formulation of Ematik Run PRP acts directly on bones, cartilage and ligaments. It induces the production of tissue matrix and synovial fluid, modulates the inflammation with analgesic properties.

What is it?

Ematik Run provides a PRP with a high platelet concentration factor, up to **8x**

Active molecules, called "Growth Factors", are directly released to the site of the wound enhancing the regenerative process.

- Simple to use
- High Regenerative Power
- Analgesic and Anti-inflammatory effect
- Multiple Applications (up to 3 injections with 2ml syringes)

Applications

Ematik Run is for the treatment of:

- Osteoarthritis
- Synovitis
- Tendon and Ligaments injuries
- Corneal Ulcers & Dry Eye Syndrome

Ematik RUN is designed, produced and commercialized by:

Prometheus S.r.l. Via Trento, 30 - 43122 Parma
